

FAITH HOPE and CANCER Final Exam

Circle T if the statement is true and F if the statement is false:

1. Cancer is one disease. T F
2. Around 400,000 children around the world get cancer each year. T F
3. Leukemia is 100% curable. T F
4. All cancer patients lose their hair.
5. About 8% of federal funding is allocated to childhood cancer. T F
6. Some babies are born with cancer. T F
7. President Bill Clinton signed the National Cancer Act in 1971. T F
8. Chemotherapy only kills cancer cells while leaving other cells alone. T F

Answer each of the following:

9. Why did Carolyn feel relieved when she was told she had leukemia?

10. How did Carolyn's peers and siblings react to her illness?

11. How did faith play a role in Carolyn's journey with leukemia?

12. Why did Carolyn's mom not venture out far in the hospital?

13. Why was Carolyn anxious about finishing her cancer treatments?

14. As an adult, Carolyn was diagnosed with another cancer. What kind and how was this one treated?

15. What role did dolphins play in Carolyn's life?

16. What role did Hem-Camp play in Carolyn's life?

17. Carolyn is involved in advocacy. What ways does she do this?

On the next page, describe how both faith and hope played a role in Carolyn's cancer journey. Explain why you think that cancer is so impactful that even 30 years later, she is still immersed in it.
